## EDUCATION

### Computer Science | Arizona State University

2016 – CURRENT

3.63 Major GPA -- 3.42 Cumulative

#### Relevant Courses:

CSE 310 – Data Structures and Algorithms

## PROJECTS

### OpenChef | Full Stack—Rails & Vue.js

SUMMER 2018

OpenChef is a full-stack application developed entirely by me, coded in Rails and Vue.js to create its own matchmaking queue for individual users—allowing them to be paired up with other people.

### League of Korean | Electron

SUMMER 2018

League of Korean is an Electron application that can modify system files to change certain gameplay elements in League of Legends.

### QuickPlay | Swift, Firebase, and CoreData

SPRING 2017

Developed a demo application coded in Swift to experiment with Firebase functions and perform API calls to other game databases.

## EXPERIENCE

### Undergraduate Teaching Assistant | ASU – CSE220 (Introduction to Programming Languages)

SPRING 2017

Responsible for multiple review sessions for a class of 70, as well as the leader for multiple in-class exercises during lecture.

## TECHNICAL EXPERIENCE

- Full Stack Development
- Data Structures
- iOS Development
- C++, Java, Vue, SQL
